The **overall satisfaction** with the total course learning workload: $(316+182)/537 = 92.7374\%$

If the talent training programme is to be revised later, based on your own learning experience, please share your opinions and suggestions on the curriculum system, such as course offerings, credit-hour allocation, and course articulation. [Fill in the blank]

Data of fill-in-the-blank questions are available via downloading the detailed data.

Student suggestions for nursing talent training programme revision

1. Too many courses and overloaded timetable. Reduce non-essential courses and offer more laboratory sessions.
2. Streamline redundant theoretical courses, add courses on professional practice, cutting-edge industry knowledge and employment-oriented content, and expand the range of elective courses.
3. Allocation of credit hours: increase the proportion of practical training hours, balance the workload across semesters, and reserve more time for self-directed learning and skill development.
4. Update course content timely in response to industry development to meet practical training requirements of professional positions.
