## Laboratory Regulations for Students

1. Students must arrive at the assigned laboratory 10 minutes early for preparation. Late arrival, early departure, or unexcused absence is not allowed. Students must wear work uniforms, maintain neat dress and professional appearance. Accessories, long fingernails, and nail polish are prohibited.

2. Students must preview before each experiment. During experiments, follow the instructor's guidance, operate correctly, and maintain a serious attitude.

3. Students must keep quiet in the laboratory. Loud talking, smoking, spitting, and eating snacks are forbidden. Speak, walk, close doors, and operate gently.

4. Take good care of public property and instruments. Do not use equipment unrelated to the experiment, including multimedia and computers, without permission. No experimental supplies may be taken out of the laboratory without approval; borrowed items must be returned promptly. Report any damage or malfunction of equipment to the instructor immediately. Those who damage equipment, utensils, or tools due to violation of operating procedures or unauthorized use shall explain the reason, submit a written self-criticism, and pay compensation in accordance with the Measures for Compensation for Damage or Loss of Instruments and Equipment.

5. Obey the experimental rules and precautions of the relevant courses.

6. After the experiment, tidy up and restore all items. A duty roster shall be implemented. Duties include making beds, organizing public equipment, cleaning the laboratory, keeping tables and floors tidy, emptying waste, checking water and electricity, closing doors and windows. Students may leave only with the instructor's confirmation.

7. After the experiment, earnestly complete the experiment report as required. The study committee shall collect all reports and submit them to the instructor within the specified time.
